Computer Science Student | Full Stack Developer | IOT

ABOUT ME

A passionate and creative software engineer with solid roots in Java, React, and blockchain technologies, I am an expert in crafting AI-powered and decentralized applications. From rolling out Google Fit for health tracking to creating NFT-based reward systems, I have the expertise to integrate technology with applications in the real world . My expertise ranges from AI-powered quizzes, smart contract development, Firebase, Node.js, and Ethereum-based applications. I am currently crafting AI-powered investment planning, finance trend analysis, and Move Agents on Aptos with secure and dynamic DeFi solution.

PROJECTS

TRACX

Developed a gamified cross-chain staking app combining fitness tracking and learning for an interactive user experience

TRUSTME

Built an Aptos Move Agent platform for automated cryptocurrency and stock trading, optimizing portfolio management.

EDUCATION

LOYOLA-ICAM COLLEGE OF ENGINEERING AND TECHNOLOGY

B.E. Computer Science and Engineering
Cumulative GPA: 9.33/10

Chennai, India
Expected July 2027

DANIEL THOMAS MATRICULATION HIGHER SECONDARY SCHOOL

HSE (97.86%)
SSLC (100% PASS)

Koyambedu, Chennai, India
2021
2019

LANGUAGES

English
Tamil

SKILLS

- React
- HTML and CSS
- JavaScript
- Solidity
- Python
- Java
- C
- IOT
- *TypeScript*
- *BootStrap*

CERTIFICATIONS

Oracle - Fundamentals of Java Nov 2024
LetsUpgrade - React Jan 2025

HOBBIES

Story Writer
Gaming

ACHEIVEMENT

NEOCODE WINNER - EICON LICET

ROLES

School Head Boy
District Handball Player
